

SUMMARY

Salesforce Developer specializing in Revenue Cloud, CPQ, and Agentforce AI solutions. Proficient in Apex, LWC, and API integrations. Proven track record building quote-to-cash workflows, pricing engines, and subscription automation systems. Certified Agentforce Specialist with strong foundation in Data Structures & Algorithms.

TECHNICAL SKILLS

- **Salesforce:** Revenue Cloud (RCA), CPQ, Advanced Approvals, Experience Cloud, Agentforce AI, Flows, Visualforce
- **ARM Lifecycle:** RCA Hooks (Pre/Post), CML Modeling, Dynamic Pricing, Asset/Contract Lifecycle, Configuration Rules
- **Development:** Apex, Triggers, LWC, Flow, SOQL, SOSL, JavaScript, REST APIs, Webhooks
- **Integration:** REST APIs, RCA Transaction APIs, Webhooks, HubSpot Integration, JSON/XML Processing
- **Tools:** Git, GitHub, Jira, VS Code, Data Loader, Salesforce CLI

PROFESSIONAL EXPERIENCE

Associate Technical Consultant – Salesforce Developer

Aug 2024 – Present

Blueflame Labs

- Developed end-to-end Revenue Cloud solutions for 5+ enterprise clients, reducing quote-to-cash cycles by 35%
- Built Apex PreHooks/PostHooks with custom CML models, eliminating pricing errors and reducing governor limit violations by 60%
- Implemented dynamic pricing engines using procedures, expression sets, and table lookups supporting 50+ SKU configurations
- Deployed Agentforce AI agents for intelligent product bundle recommendations, reducing manual quote prep time by 40%
- Automated asset and contract lifecycle workflows processing 1000+ annual subscription renewals with zero manual intervention
- Developed REST APIs and bidirectional webhooks for real-time Salesforce-HubSpot synchronization across 10K+ customer records
- Built nested parallel/sequential approval flows via CPQ Advanced Approvals, cutting approval cycles from 48 to 12 hours
- Created LWC-based B2B Partner Portals on Experience Cloud serving 200+ external users with enterprise-grade security controls

PROJECTS

Enterprise Revenue Cloud & CPQ Automation Platform

- Developed CPQ engine using RCA Hooks and CML validation, reducing quote generation time by 50%
- Migrated legacy pricing data for 5000+ product SKUs into Salesforce Revenue Cloud via Data Loader and Apex batch jobs
- Implemented 7 dynamic pricing strategies with expression sets and table lookups for complex B2B multi-tiered billing
- Configured multi-currency and multi-entity quote processing with fully automated nested approval hierarchies
- Built PreHooks and PostHooks for transaction validation and real-time pricing adjustments, ensuring 99.9% accuracy
- Executed contract lifecycle automation for automated renewals and mid-term amendments across 500+ active contracts

Real-time Slack & Jira Integration with Bidirectional API Bridge

- Built custom Apex REST bridge connecting Jira with Slack, automating notifications for 80+ engineering team workflows
- Optimized webhook listeners and JSON parsing layers achieving sub-second message delivery for 99% of transactions
- Implemented bidirectional API synchronization with automatic status mapping across Jira tickets and Slack updates
- Deployed robust error handling and exponential backoff retry logic ensuring 99.8% message delivery reliability

CERTIFICATIONS

- Salesforce Certified Agentforce Specialist

EDUCATION

B.Tech in Information Technology

2020 – 2024

G.L Bajaj Institute of Technology and Management

CGPA: 7.8/10

TECHNICAL DEPTH

- **Problem-Solving:** Solved 700+ Data Structures and Algorithms challenges across LeetCode and GeeksforGeeks
